TruBalance

Smart Expense Tracker & Invoicing App

Project Documentation & Walkthrough

1. Overview

TruBalance is a comprehensive financial management tool designed for freelancers and small businesses. It combines powerful expense tracking, professional invoicing, and AI-driven insights into a single, intuitive interface.

Built with the MERN stack (MongoDB, Express, React, Node.js), TruBalance ensures your financial data is secure, accessible, and actionable.

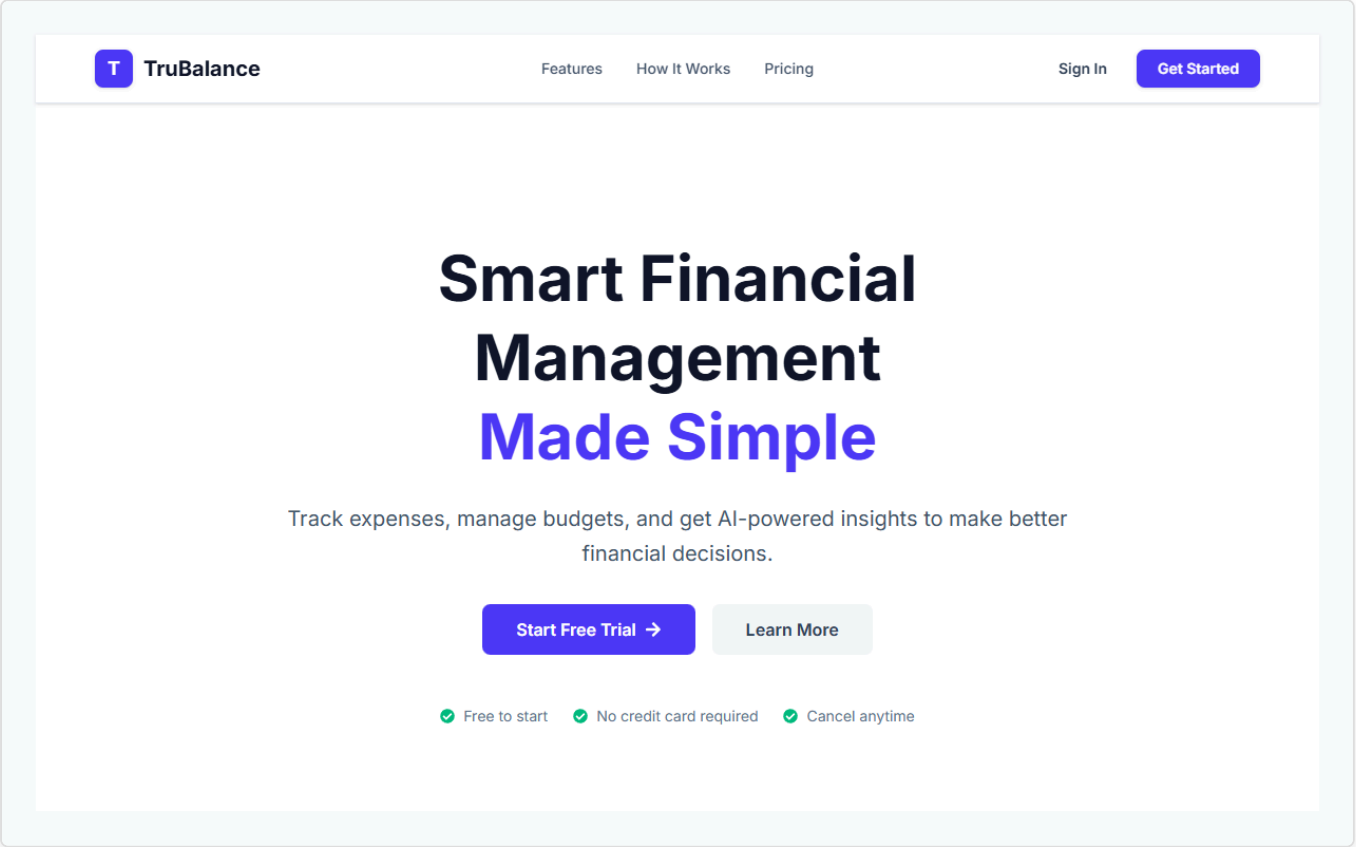
Key Capabilities

- **Smart Invoicing:** Create, send, and track GST-compliant invoices.
- **Expense Tracking:** Log and categorize expenses effortlessly.
- **AI Insights:** Get personalized budget recommendations and spending analysis.
- **Client Management:** Maintain a detailed database of your clients.
- **Financial Health:** Visualize your income, expenses, and net balance in real-time.

2. Features & Walkthrough

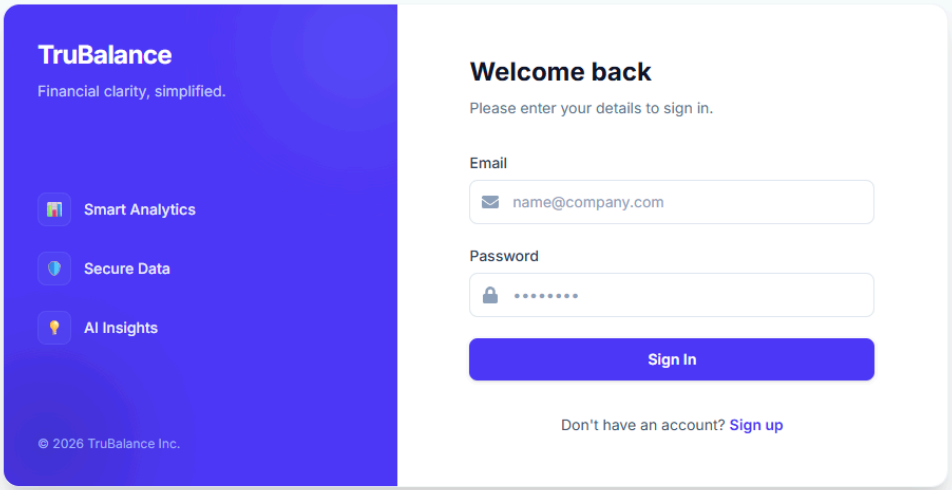
1. Landing Page

Clean and modern landing page introducing the application's value proposition.



2. Secure Authentication

Secure user registration and login system to protect your financial data.



TruBalance
Financial clarity, simplified.

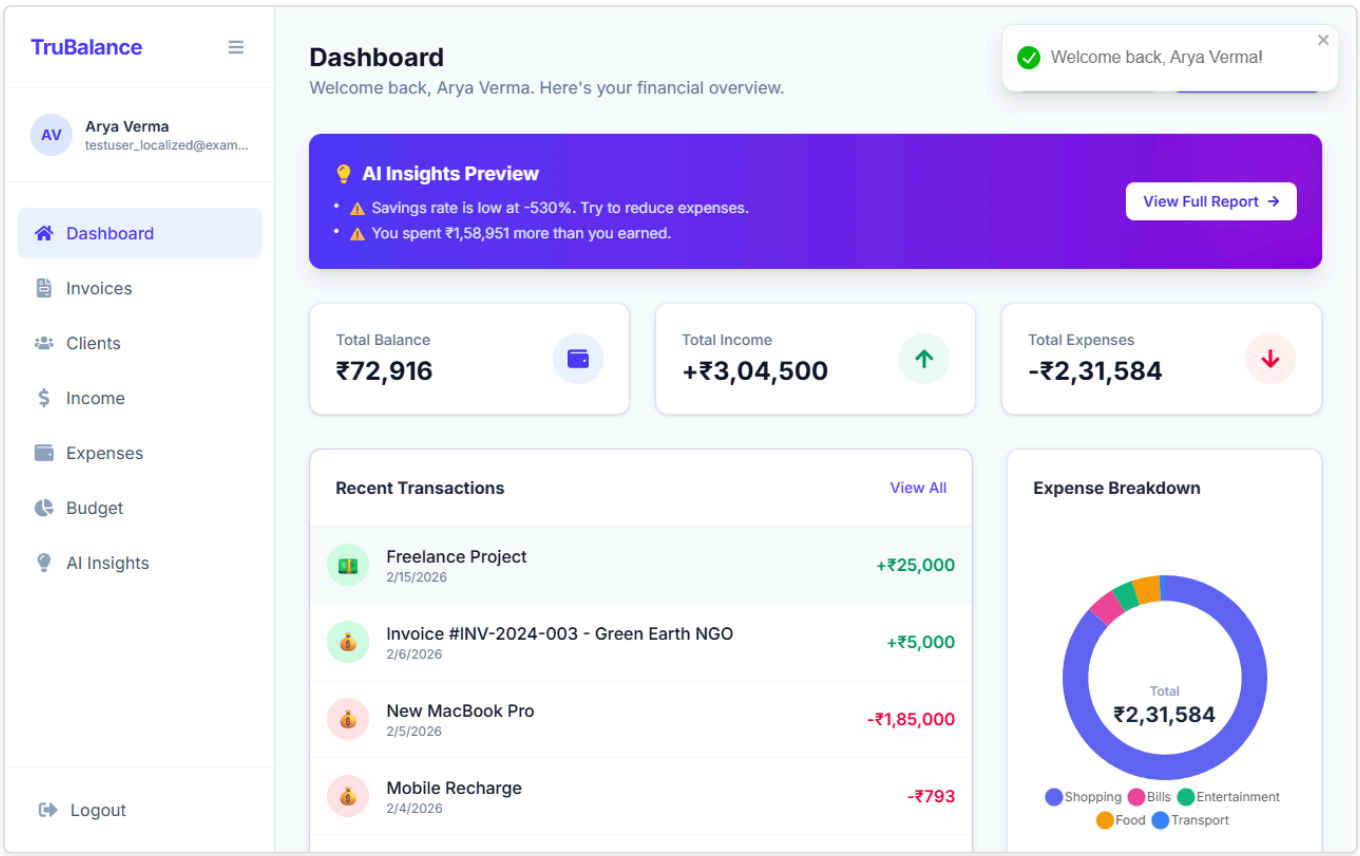
3. Dashboard

Your financial command center. View real-time stats on total income, expenses, and balance. Quick access buttons allow you to immediately log an expense or create an invoice.



4. Invoice Management

Create professional invoices with automatic GST calculation.

- **Create:** Easy-to-use form for adding clients, line items, and tax details.
- **Track:** Monitor status (Draft, Sent, Paid, Overdue).
- **Automated Income:** Mark an invoice as "Paid" and it automatically records as Income.

Total Income

Keep up the good work! Tracking your income is the first step to financial freedom.

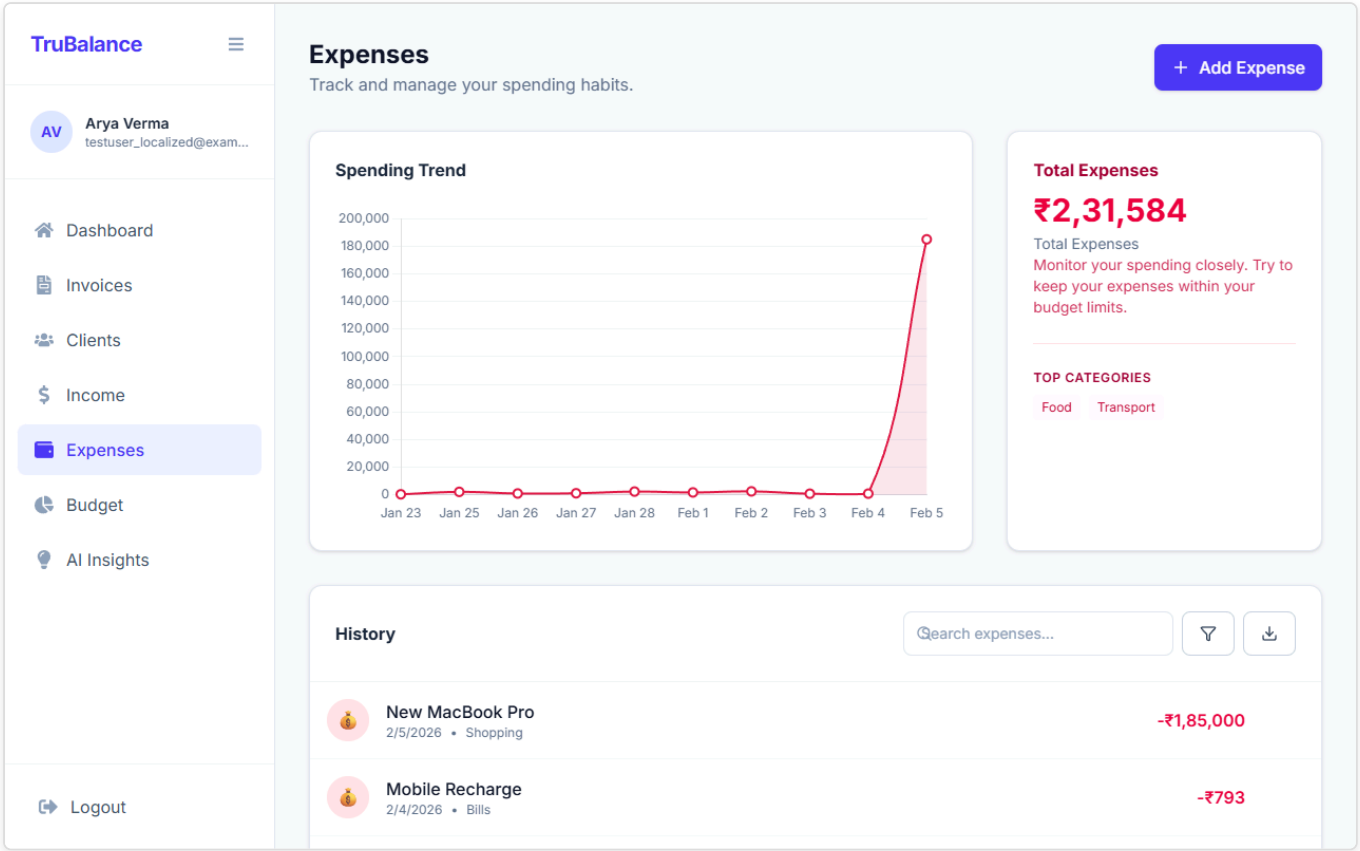
History

Search income...

Freelance Project 2/15/2026 • Freelance	+₹25,000
Invoice #INV-2024-003 - Green Earth NGO 2/6/2026 • Business	+₹5,000

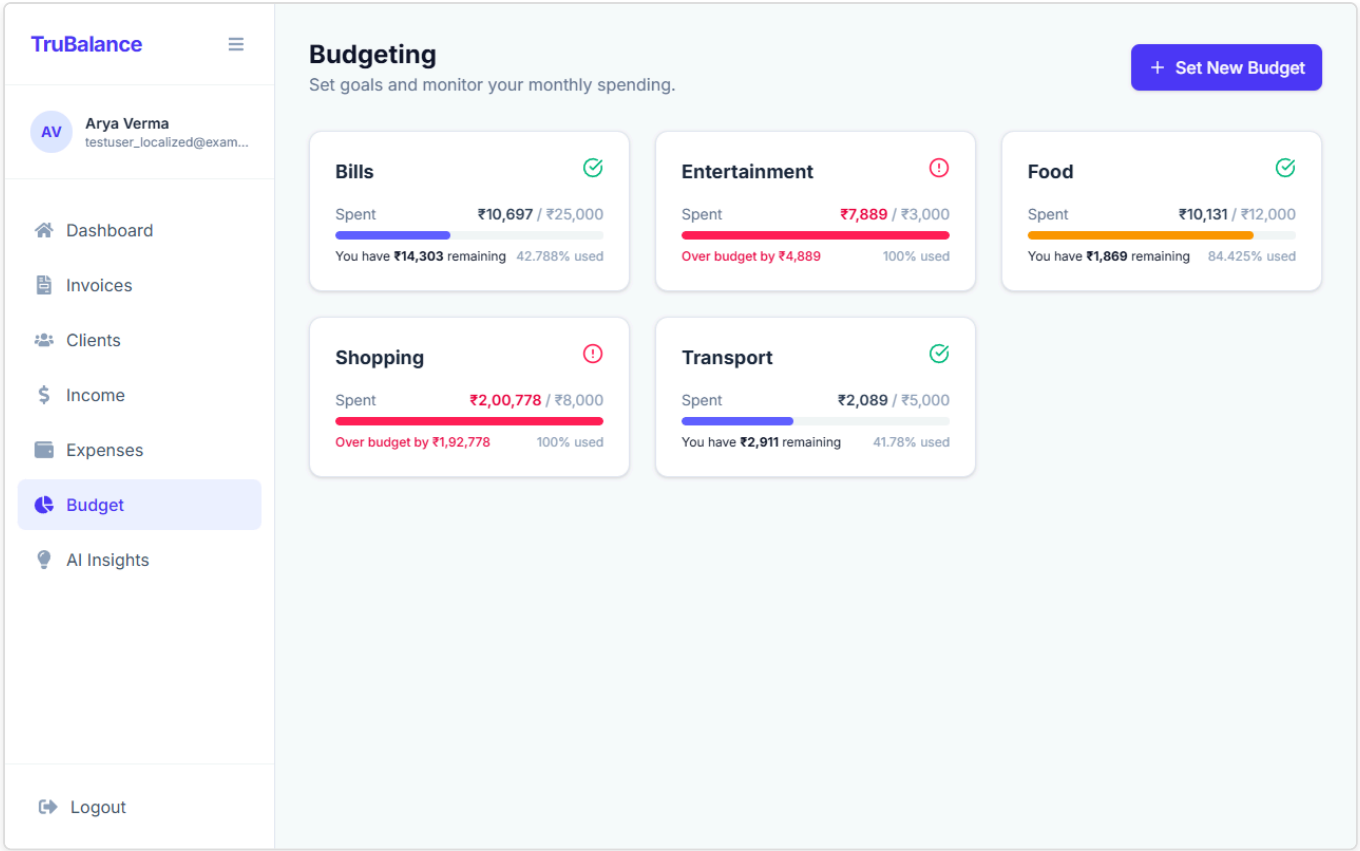
7. Expense Tracking

Log and categorize expenses to see exactly where your money goes.



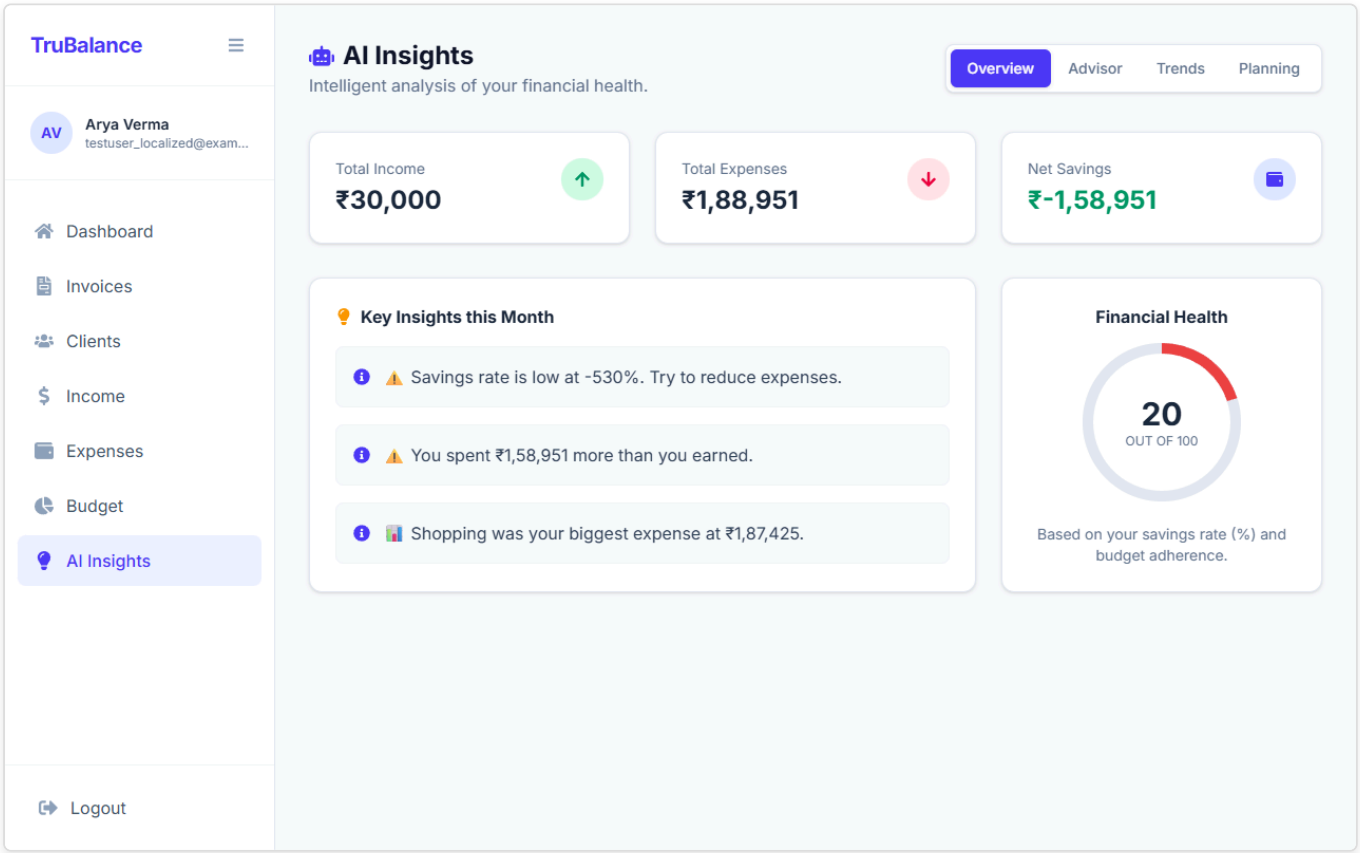
8. Smart Budgeting

Set limits for categories like Food or Shopping and get alerts when you're close to overspending.



9. AI Insights

Get personalized financial advice and monthly reports powered by AI.



3. Technology Stack

- **Frontend:** React, Vite, Tailwind CSS, Recharts
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Authentication:** JWT (JSON Web Tokens)
- **AI Integration:** Google Gemini

4. Installation Guide

Follow these steps to run TruBalance locally.

Prerequisites

- Node.js (v14+)
- MongoDB (Local or Atlas URI)

1. Clone the Repository

```
 git clone https://github.com/yourusername/trubalance.git
cd trubalance
```

2. Backend Setup

```
 cd server
npm install
```

Create a `.env` file in the `server` folder with PORT, MONGO_URI, JWT_SECRET, and GEMINI_API_KEY.

```
 npm run dev
```

3. Frontend Setup

```
 cd client
npm install
npm run dev
```
